PRODUCING SUGAR SUSTAINABLY

The sugar industry prioritizes its people and the communities it serves. Michigan Sugar Company donates more than 100,000 pounds of sugar to community food pantries and churches every year.

FUN FACT

In 1898, Michigan completed its first successful sugarbeet season. Back then, sugarbeet growers were amazed to harvest 32,000 tons of sugarbeets. Now, Michigan sugar growers harvest, on average, more than 4.3 million tons of sugarbeets.

"From soaring input prices to unpredictable weather to unfair foreign trade practices, farming is in many ways tougher than ever. While we're no strangers to hard work or tough seasons, even the most resilient farm families need a fair shot."

- Rita Herford, Sugarbeet Farmer, Minden City, Michigan
