## PRODUCING SUGAR SUSTAINABLY

Improved farm policies are key to securing a more resilient future for Washington sugarbeet growers. At one time, tens of thousands of acres of sugarbeets were planted in Washington State. Now, there's fewer than 2,000.

### FUN FACT

The sugarbeets raised in Washington are all grown in Benton County.

## COMPANIES

"Just as sugar is a vital part of our nation's food security, **growing sugarbeets has been a vital part of our farm's crop rotation for over 30 years.** They serve both an important economic role to our farm as well as an agronomic role in maintaining a healthy soil for long term success"

- Ryan Munn, Sugarbeet Farmer, Prosser, Washington
